EXPERIENCE

● AMUSE - PERSONAL PROJECT

Freelance UI/UX Designer

Sep 2022 - Dec 2022

The Netherlands

Developed a museum platform application that provides information on various dutch museums and facilitates seamless ticket purchasing for users

Implemented a strategic approach to problem-solving, which includes market/user research, data analysis, user persona creation, user journey mapping, and prototyping

Created a logo, design system and user-centric interface design based on UI design principles and user psychology

● BITESTREAMS

Freelance Visual, UI/UX Designer

Apr 2022 - Sep 2022

The Netherlands

Performed Branding and UI/UX design as a project for a Tech startup company

Conducted extensive research on web user behavior, identified pain points and potential solutions, and crafted a UX flow, wireframe and design system

Delivered a website with visually appealing 3D illustrations that emphasized the technical nature of the company and engaged users

● MERCOR

Freelance Visual Designer

Jan 2022 - Mar 2022

The Netherlands

Designed 3D illustrations related to the cryptocurrency industry, which include financial charts and digital coins featuring the company's logo

● FREELANCE DESIGNER

2020 - Present

Executed multiple design projects such as UI/UX design and Branding as a freelancer, primarily serving small and medium-sized enterprises

Gained strong presentation, collaboration, and communication skills with stakeholders while working as a freelancer in an agile environment

Awarded a Logo Design Contest for an entertainment company hosted by Loud Sourcing

TOOLS

- Figma
- Adobe XD
- Adobe Illustrator
- Adobe Photoshop
- Adobe InDesign
- Adobe Dreamweaver
- Adobe After Effects
- Adobe Premier Pro
- JSON / Lottie files
- HTML / CSS

SKILLS

- Visual Design
- Branding
- UI/UX Design
- 3D Illustration
- Design System
- Motion Design
- Editorial Design
- Typography
- UX Research
- UX Flows
- User Survey
- Prototyping
- Responsive Design

EDUCATION

● BACHELOR'S DEGREE IN VISUAL DESIGN

University Of Seoul

2015 - 2021

Seoul, Korea

Took courses in Visual design, UI/UX design, Branding, Illustration, Motion design, Editorial design and Typography

Self-taught HTML and CSS, and developed several websites

LANGUAGES

- Korean - Native
- English - Professional
- Dutch - Beginner

amuse

a muse

Dutch Museum App

a muse is an app that gives users information about the museums in the Netherlands and helps users to buy tickets for museums.

Users can find a museum they wish to visit using the filtering function. Moreover, *a muse* shares news about upcoming exhibitions and reviews of the recent exhibitions on users' 'blogs.

Used Tools

Design Process

Market Research

- In 2020, the Dutch Museum Association recorded a total of 456 museums. (Statista)
- The number of museum visitors dropped by another 1.4 million last year, from 13.2 million in 2020 to 11.8 million in 2021, the Museum Association reported on Monday.
In pre-pandemic 2019, Dutch museums had 32.6 million visitors. (NL Times)
- "Smaller museums, municipal museums, and private museums had a particularly hard time," the Museum Association said. (NL Times)

The number of museum visitors from 2019-2021 in the Netherlands

User Research

I conducted a survey of 16 participants. (10 participants live in the Netherlands / 6 participants visited the Dutch museum as a tourist)

What motivates you to go to museums?

(Multiple choices available, with the maximum choice of two)

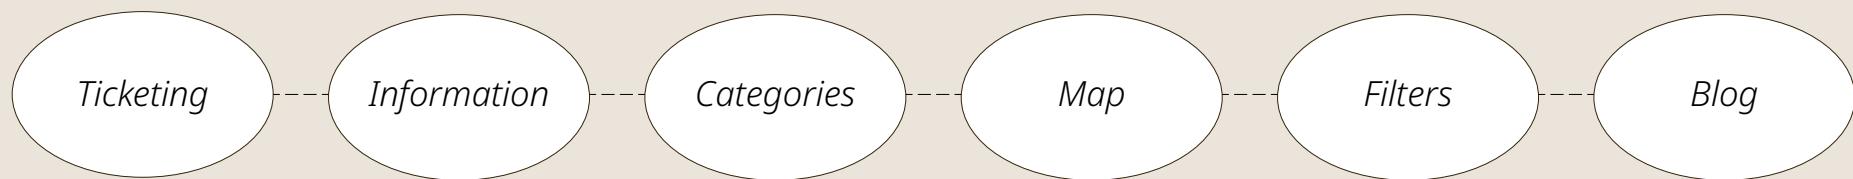

Research Result

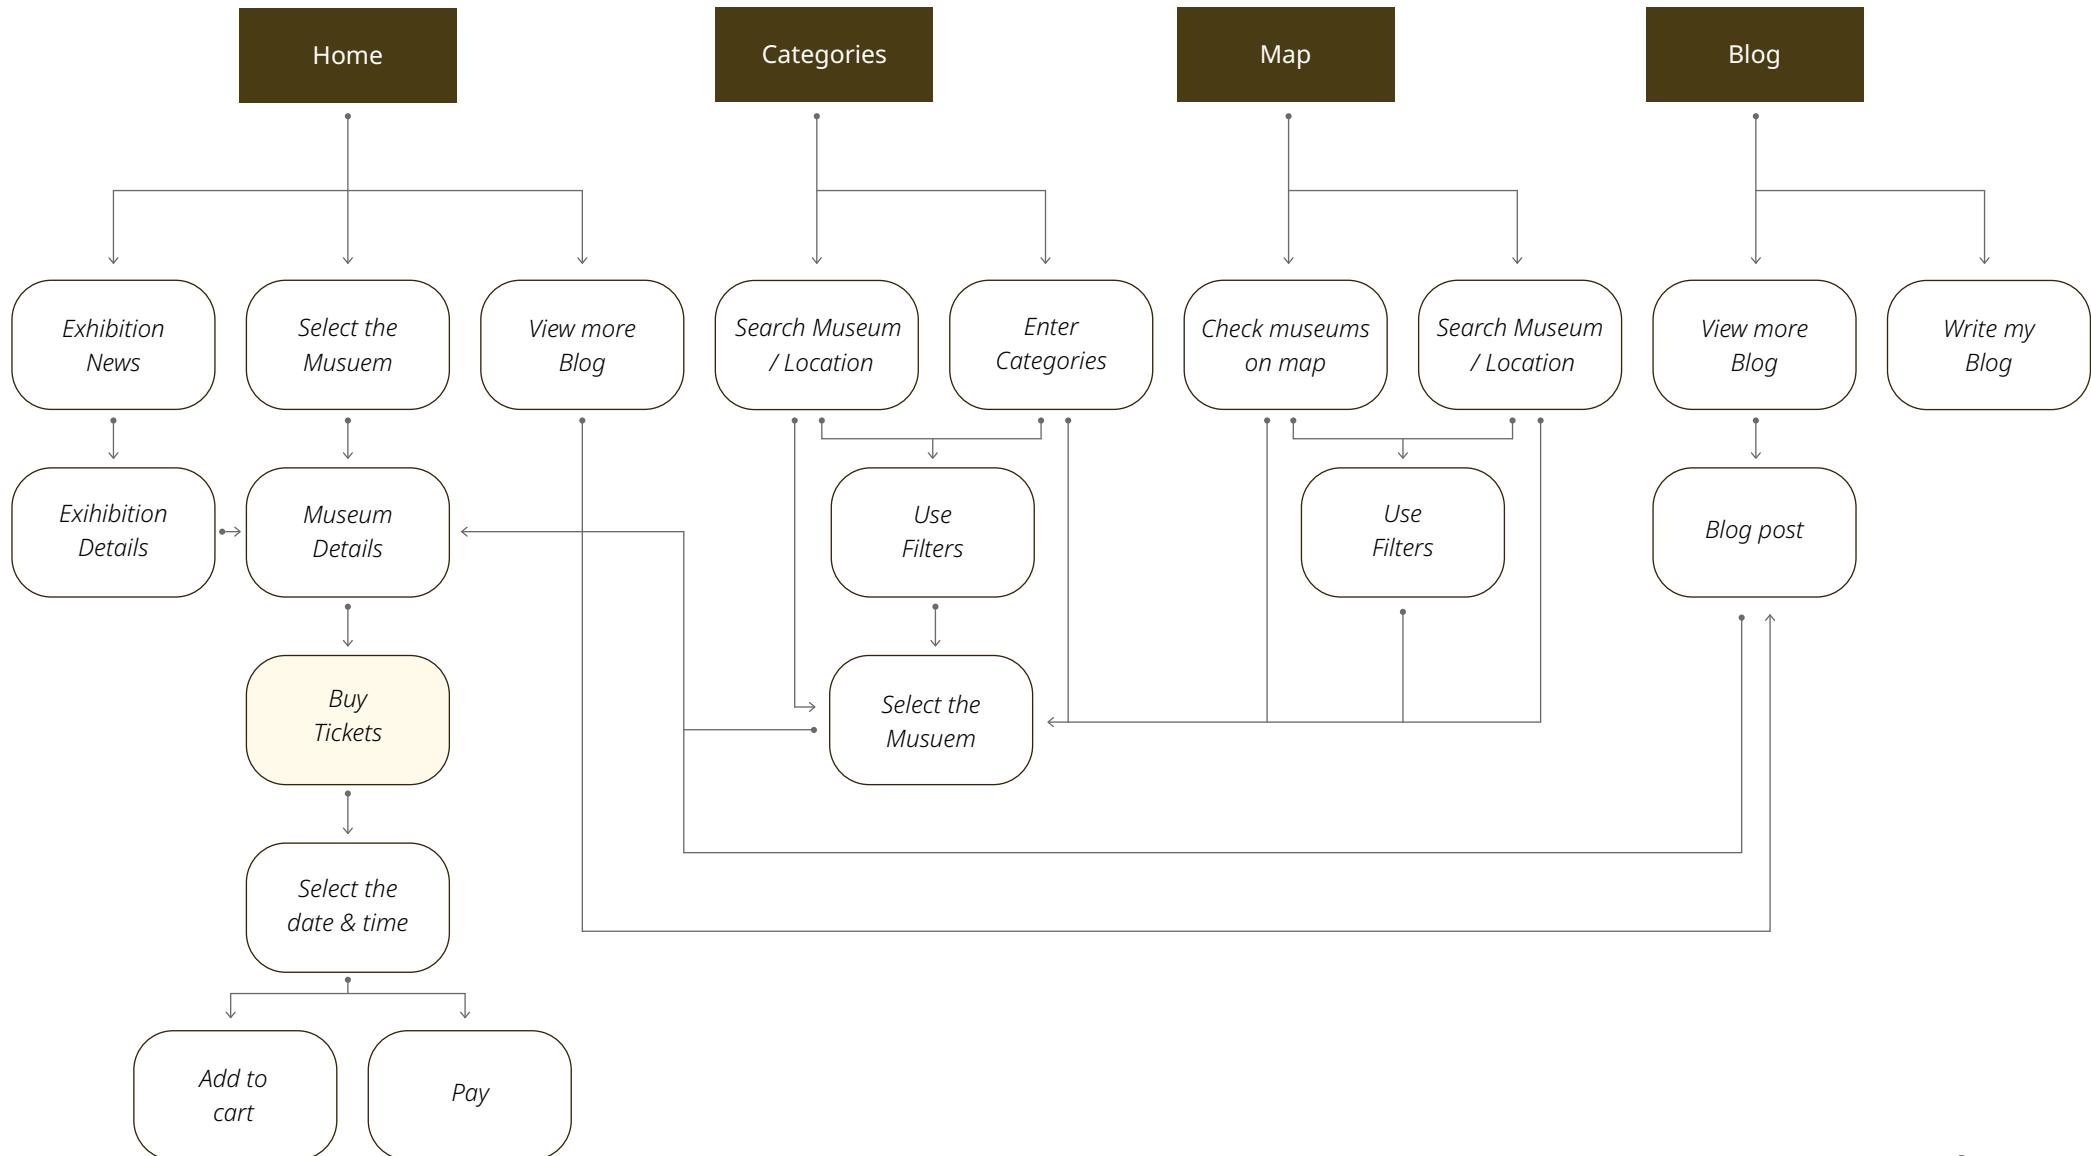

- Market Research showed that the decline in Dutch museum visitors is an acute problem
- In the User Research, ***the most important thing*** that motivates people to visit museums is an ***Easy ticket purchase***

Project Goal

Create a Dutch museum platform app that connects users to museums. The app not only helps users to purchase tickets easily, but also offers a variety of detailed information about museums and ticket discounts. In addition, add a Blog section where users can share their museum experiences.

Main Keywords

UX Flow

Design System

Style Guide

In order to express the calmness, classicality, and stability unique to the museum, I selected a brown and khaki color series. A serif font in the heading was utilized to emphasize classicality. However, for the user's readability, the title/body text used a sans-serif font.

Typefaces

Charter

Heading Black
Heading Bold
Heading Roman

SF Pro Text

Title Semibold
Title Medium
Title Regular

SF Pro Display

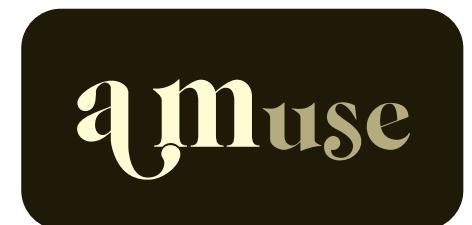

Body Text Bold
Body Text Medium
Body Text Regular

Colors

Logo

In order to emphasize the museum's long history, designed the logo with antiqueness, which is based on a serif font. *a muse* is a word that combines *a museum* and *amuse*.

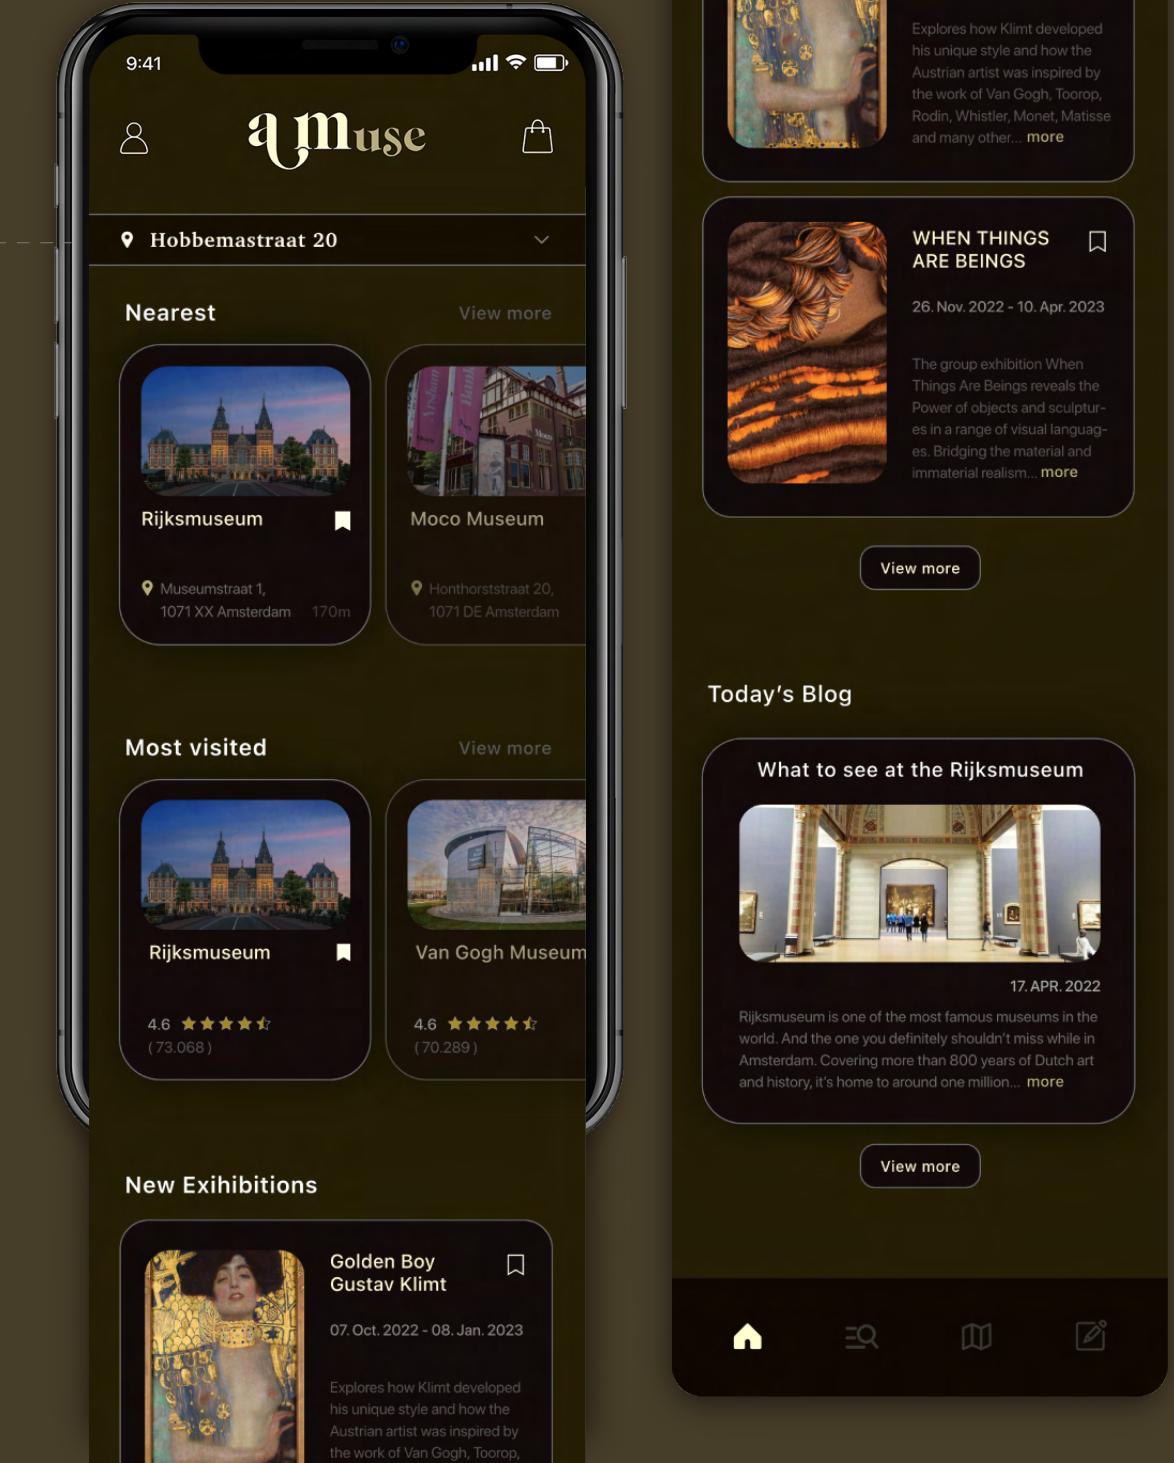

Home Screen

On the Home Screen, users get recommendations of museums, including the nearest, and most visited museums. Additionally, users can get information about new exhibitions and check reviews of museums on today's blog.

- Nearest museums
- Most visited museums
- New exhibitions
- Today's blog

Automatically set my current location
> Can change the location where I want

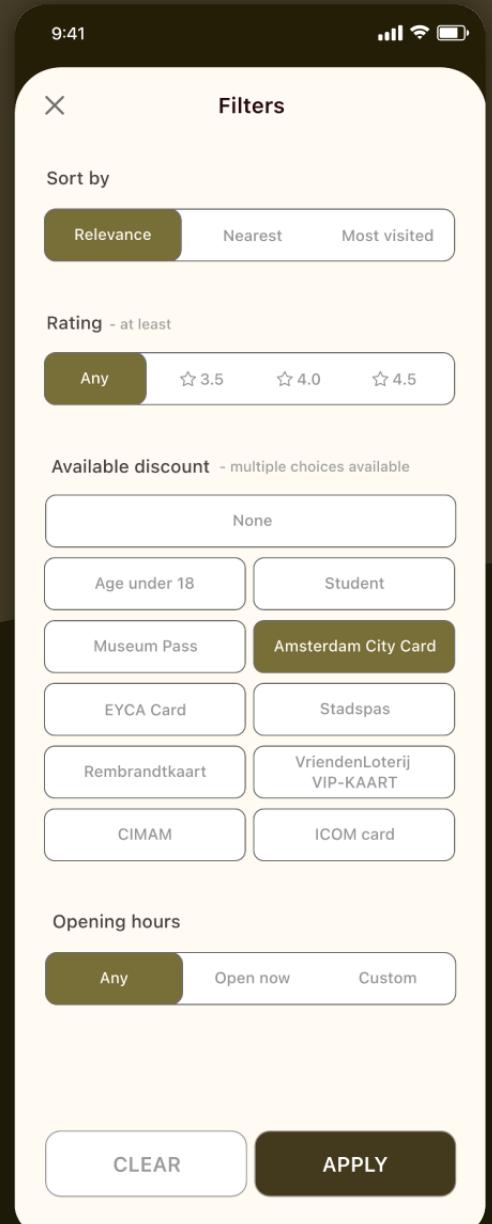

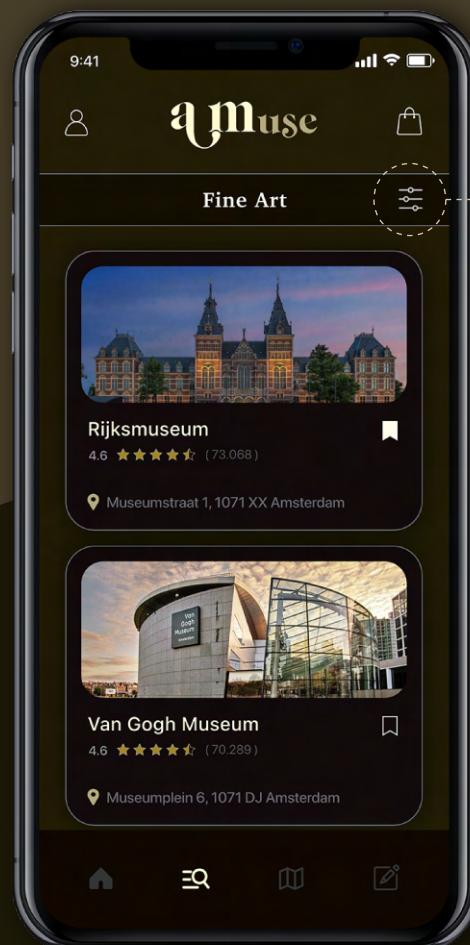

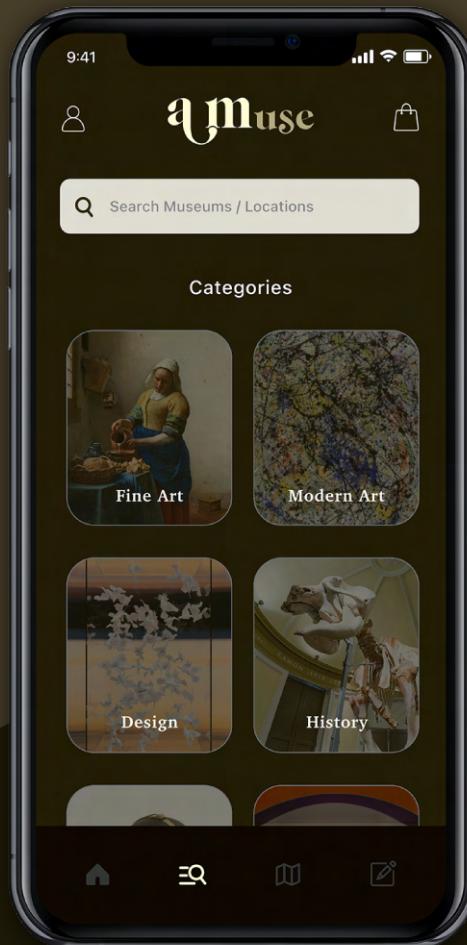

Categories & Search

There are 8 categories of museums. By categorizing and filtering functions, users can find a museum that interests them. The filtering function includes ratings, available discounts, and opening hours.

8 Categories

- Fine art
- Modern art
- Design
- History
- Military
- Science
- Pop-up
- Others

Museum Detailed Page

Users can check the location of a museum, opening hours, reviews, photos, exhibition information, and blog reviews.

Users can decide to buy a ticket based on this detailed information.

Exhibitions info

Ticketing Page

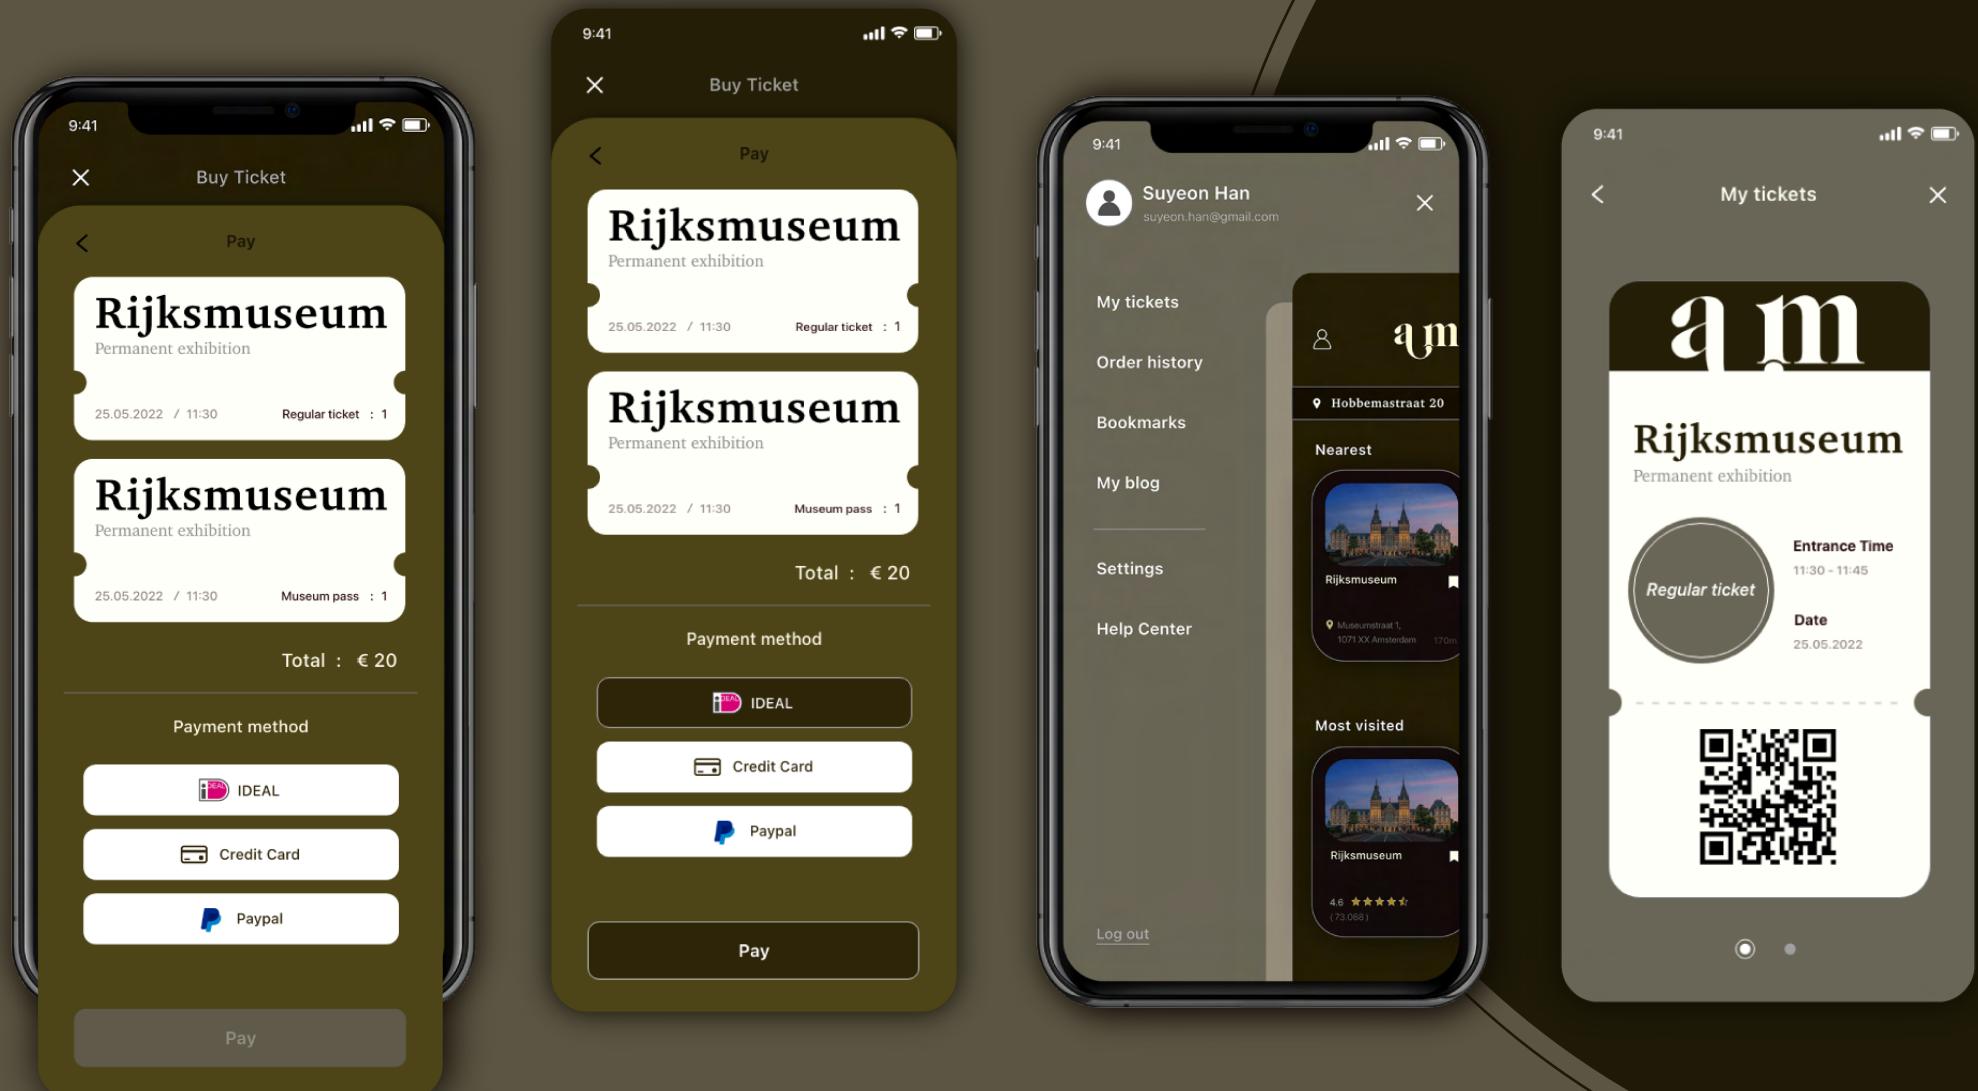

Users can select the date, choose the exhibition, and select the entrance time. After these steps, users can choose the tickets and add them to the cart for payment.

Pay & My tickets

There are 3 payment methods, **IDEAL**, **Credit Card**, and **PayPal**, and users can decide a payment method they want.

After paying, users can check their tickets on my page.

Map & Filters

Users can check the locations of museums on the map together with their current location. There is a filter function in which users can apply the filters and check the museums on the map. During the opening hours, if users select *Custom*, they can choose the date and time.

Others

Blog

The Blog page presents Today's Blog and 8 Blog Categories.

8 categories are the same as the museum categories. Users can check the detailed reviews of museums.

Also, they can write their blog posting by clicking an icon on the upper right side to share their experiences in museums.

A screenshot of the amuse mobile application. At the top, there is a search bar with the placeholder "Search Museums". Below it, the "Today's Blog" section displays two articles:

- Rijksmuseum**: "What to see at the Rijksmuseum" (17 APR. 2022 | 13,940 read)
- Stedelijk Museum**: "What is the Modern Art?" (28 APR. 2022 | 8,138 read)

Below these, a "Blog Categories" section lists eight categories, each with a thumbnail image and the category name:

- Fine Art (Thumbnail: classical painting)
- Modern Art (Thumbnail: abstract painting)
- Design (Thumbnail: interior design items)
- History (Thumbnail: historical artifacts)
- Military (Thumbnail: military exhibits)
- Science (Thumbnail: scientific exhibits)
- Pop-up (Thumbnail: temporary exhibit)
- Others (Thumbnail: various items)

The bottom of the screen features a dark navigation bar with icons for Home, Search, Map, and Edit.

Used dark blue color to express an image of digital and calmness

BiteStreams

BiteStreams

3D Illustration, UI/UX design

Designed responsive web and mobile interfaces, conducting research to understand user behavior and enhance their browsing experience. Analyzed the shortcomings of the previous website and implemented solutions to improve user experience.

Organized a clear and intuitive main menu structure and used concise descriptions of the company on the main page. Created 3D illustrations to reinforce the technical and professional image of the company.

Used Tools

Illustrator

Photoshop

Figma

Slack

A laptop is shown from a top-down perspective, displaying the BiteStreams website. The website has a blue-themed header with the 'BiteStreams' logo and navigation links for 'COMPANY', 'SERVICES', and 'CASE STUDIES'. Below the header is a large, stylized graphic of a computer chip or circuit board with glowing blue lights and data streams. A smartphone is positioned in front of the laptop, also displaying the same website, showing how it looks on a smaller screen. The laptop's keyboard is visible at the bottom. To the right of the laptop, there is a sidebar with the heading 'Let Data Decide' and a brief description of the company's services. At the bottom of the laptop screen, there are logos for various technology partners: Amazon Web Services, Google Cloud, Docker, Kubernetes, Python, and PyTorch. The overall theme is modern and tech-oriented.

Duration

2022.06 - 2022.09

Design

- First impressions of a website are **94% design-related** (WebFX)
- **59%** of people *prefer browsing 'beautiful and well-designed'* sites than basic ones (Adobe)
- Users spend **5.94 seconds** looking at the main *website image*, on average (CXL)

Content

- **86%** of people want to see product and service *information on a website homepage* (Komarketing)

Research

Responsive design

- **54.8%** of internet traffic came *from mobile devices* in 2021 (Statista)
- **61%** of internet users have a higher opinion of companies *with mobile-friendly website design* (WebFX)

Color

- *A colour theme* improves website recognition by **80%** (Forbes)
- **39%** of web users are *drawn to color* more than any other visual element when visiting websites (PR Newswire)

Problem Statements & Solutions

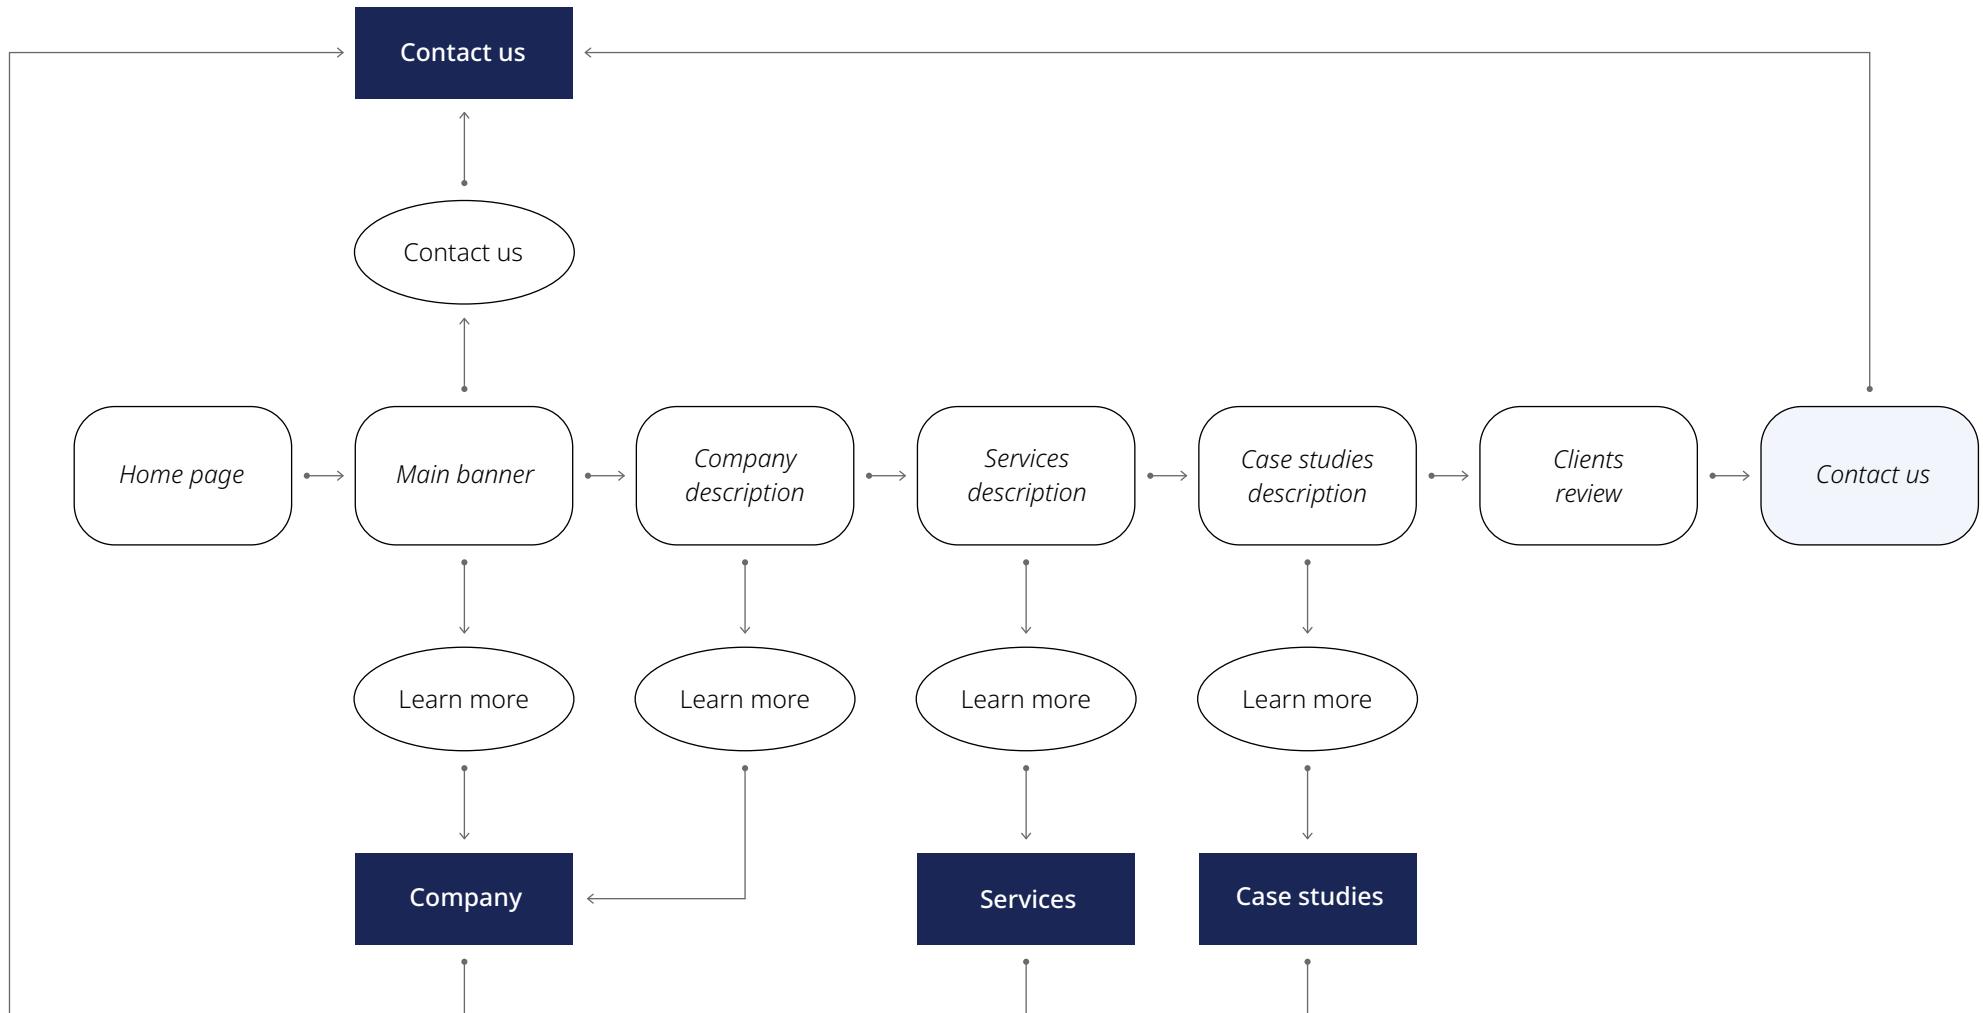

Problems

- Inconsistent color themes (Black, Yellow)
- Boring free images in the main banner that don't attract users
- Unorganized order of contents
- Too much text that decreases readability
- Unstructured menu
- All the information about the company was on the homepage, so users did not feel the need to explore other menus

Solutions

- Set a unified color theme throughout the website (Blue)
- Create visually appealing 3D graphics for main banner to attract users
- Reorganize the content on the website to make it easier to navigate and find information
- Reduce the amount of text on the website and use more visuals to improve readability
- Create a structured menu with clear labels and categories to make it easier to navigate
- Move some of the information from the homepage to other pages and add CTA buttons to encourage users to explore the website further

UX Flow

Website

The image shows a screenshot of the BiteStreams website. At the top, there is a navigation bar with the company logo, menu items for 'COMPANY', 'SERVICES', 'CASE STUDIES', and a blue 'CONTACT US' button. Below the navigation, there is a large banner featuring a blue circuit board background with three 3D isometric icons representing data analysis: a smartphone-like device with a chart, a laptop with a bar graph, and a server-like block with a gear icon. To the right of these icons, the text 'Let Data Decide' is displayed in a large, bold, dark blue font. Below this text, a paragraph describes the company's focus: 'BiteStreams is a software agency that builds end-to-end software deliverables. We specialize in data analysis, artificial intelligence and big data, providing solutions to real-world problems.' At the bottom of the banner, there are two white buttons with blue text: 'LEARN MORE' and 'CONTACT US'. At the very bottom of the page, there is a footer row containing logos for various technologies: PostgreSQL, Amazon Web Services, Google Cloud, Docker, Kubernetes, Python, PyTorch, and Kafka.

Website

The image shows a screenshot of the Mercor website as it would appear on a Mac OS X desktop. The window has the characteristic red, yellow, and green control buttons at the top-left corner. The main content area features the Mercor logo (a blue stylized hexagon icon followed by the word "MERCOR" in blue capital letters) on the left and a navigation bar with "ABOUT ▾", "MRCR ▾", and "LAUNCH DAPP ▾" on the right. The central focus is a large, bold title: "Decentralized Crypto Bot Marketplace" in blue. Below the title, a descriptive paragraph explains that Mercor is the first DeFi platform for algorithmic copy trading. At the bottom, two blue call-to-action buttons are visible: "LEARN MORE" and "LAUNCH DAPP". To the right of the text, there is a graphic element consisting of a hexagonal grid pattern in shades of blue, with several blue hexagonal coins stacked in the foreground.

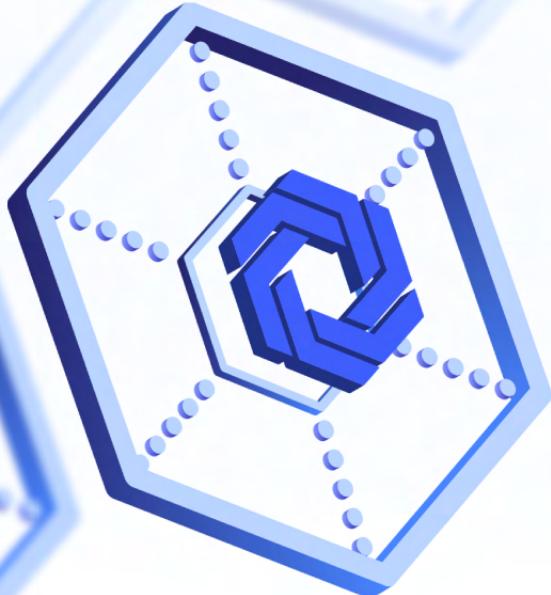

ABOUT ▾ MRCR ▾ LAUNCH DAPP ▾

Decentralized Crypto Bot Marketplace

Mercor is the first and only DeFi platform that offers algorithmic copy trading. Connect, select, and invest in algorithms created by leading hedge funds, talented developers, and crypto enthusiasts.

LEARN MORE LAUNCH DAPP

Decentralization & Democratization

Mercor disrupts financial markets by building a bridge between algorithmic trading and every-day investors worldwide.

Markets in which licenses and data are inherent to a competitive edge, large institutional investors are dominant. This dominance is caused by the lack of cooperation between private traders and developers. Here at Mercor, we aim to radically change this dominance, by creating an infrastructure that facilitates this cooperation, aiming to democratize the algorithmic trading market.
